ABOUT US & LEADERSHIP PROFILE

Green Hydrogen • Renewable Energy • Carbon Capture

POWERING A GREENER FUTURE

Chirag Gajera

Director & CEO

Ashish Dobariya

Director – Marketing

Mahesh Akoliya

Director – R&D;

Building practical solutions for a low-carbon future.

Rio Green Energy Private Limited is a clean-energy and sustainable-technology company focused on developing practical solutions for the transition towards a low-carbon future. Our work brings together technology, engineering, research & development, project execution and business development across emerging clean-energy opportunities.

Our strategic focus is on **Green Hydrogen, Renewable Energy and Carbon Capture**. We aim to develop solutions that are reliable, scalable and commercially viable, while creating long-term value for industrial customers, technology partners and the wider energy ecosystem.

“Innovation becomes meaningful when it can be engineered, validated and deployed in the real world.”

OUR VISION

To become a trusted clean-energy technology and solutions company contributing to a sustainable, low-carbon future through innovation, engineering and responsible execution.

OUR MISSION

- | | |
|----|--|
| 01 | Develop practical and commercially viable green hydrogen solutions. |
| 02 | Accelerate renewable-energy adoption for industrial applications. |
| 03 | Build capabilities in carbon capture and industrial decarbonisation. |
| 04 | Invest in R&D, pilot projects and indigenous technology development. |
| 05 | Build long-term partnerships across the clean-energy ecosystem. |

WHAT WE DO

Our Clean-Energy Focus

Rio Green Energy is building capabilities across the clean-energy ecosystem, with a strong emphasis on research, pilot-scale development and real-world industrial applications.

GREEN HYDROGEN

Development of green hydrogen production technologies, pilot projects, R&D; and future large-scale applications.

SOLAR ENERGY

Integration of solar power as a key renewable source for sustainable and industrial energy projects.

WIND ENERGY

Exploring wind-energy integration to support reliable and cost-effective renewable power generation.

CARBON CAPTURE

Exploring technologies and solutions aimed at reducing industrial carbon emissions and supporting decarbonisation.

RESEARCH & DEVELOPMENT

Building in-house technical capabilities, experimentation and pilot-scale systems to turn ideas into practical solutions.

PROJECT EXECUTION

Connecting technology, engineering and field operations to move promising solutions from concept toward deployment.

OUR DEVELOPMENT APPROACH

01 IDENTIFY
Understand industrial energy and decarbonisation challenges.

02 RESEARCH
Study technologies, economics and applications.

03 DEVELOP
Build and test pilot-scale solutions through R&D.;

04 VALIDATE
Evaluate performance, reliability and commercial feasibility.

05 SCALE
Move successful solutions toward larger industrial applications.

LEADERSHIP TEAM

People driving the vision into execution.

Rio Green Energy is supported by a multidisciplinary leadership team covering strategy, business development, marketing, R&D;, field operations, finance and team management.

Mr. Chirag Gajera

Director & CEO

vision, strategy and business direction,
s on building Rio Green Energy in the
energy sector.

Mr. Ashish Dobariya

Director – Marketing

Marketing, business development, strategic
relationships and market opportunities.

Mr. Mahesh Akoliya

Director – R&D;

Research, technology exploration, innovati
development of practical clean-energy solu

LEADERSHIP TEAM

People driving the vision into execution.

Rio Green Energy is supported by a multidisciplinary leadership team covering strategy, business development, marketing, R&D, field operations, finance and team management.

Mr. Gautam Chodvadiya

Director – Field & Operations

Execution, operations, implementation and coordination of technical activities and projects.

Mr. Girish Dobariya

Director – Accounts & Team Management

Accounts, financial management, internal coordination and team-management activities.

Mr. Piyush Gajera

Director – Marketing

Marketing, business development, market outreach and strategic growth initiatives.

TEAM PRINCIPLE

We believe strong clean-energy projects require more than technology alone — they require coordinated leadership, disciplined execution and long-term partnerships.

GREEN HYDROGEN • RENEWABLE ENERGY • CARBON CAPTURE
